Turing – LLM Data Scientist

(APR 2024 – APR 2025)

Palo Alto, California

- Trained an undisclosed LLM for complex queries like code generation and tool-driven query resolution
- Curated large-scale datasets to train the model in advanced Python plotting across multiple libraries
- Applied SFT to refine model responses using API-driven tools for web search, browsing, and scraping

PoliSpace — Flight Software Engineer

(MAY 2021 – APR 2024)

Milan, Italy

- Software Team member of the 6S Cube Satellite mission in direct collaboration with ESA
- Implemented core Flight Software in C onto the GomSpace OBC
- Won the LeanSpace Hackathon at the Space Tech Expo 2022 in Bremen, Germany

Gucci — Software Development Intern

(OCT 2019 – SEP 2020)

Milan, Italy

- Agile team “Zero” member tasked with the development of Gucci’s e-commerce software system
- Implemented gucci.com’s “contact us” page as a NodeJS React App connected to the SAP Hybris backend system through Java RestAPIs
- Tested features extensively in QA environments before deploying to production with Jenkins

Politecnico di Milano — Ingegneria Informatica

Bachelor of Science in Computer Science Engineering

Thesis (Score: 30 Laude)

Part I. Algorithms: Fully-optimized Dijkstra’s algorithm (in C)

Part II. Software Engineering: Multiplayer Game with Socket Connections and GUIs (in Java)

Part III. Digital Circuits & Logic Design: Hardware Module (in VHDL)

University of Southern California — Viterbi School of Engineering

Data Analytics Bootcamp

Le Swish Prophet – URL

(DEC 2018 – P)

LSP is a web application designed to predict the outcomes of NBA games and outperform Las Vegas sportsbooks. The predictive algorithm uses a dynamically trained ML model, the data mining software uses a web scraping API system, and the site infrastructure runs on a Python server in the Google cloud.

Languages: English, Spanish, Italian

Coding Languages: Python, Java, C, MySQL, Bash, JavaScript, HTML, CSS, Swift, Visual Basic, R, VHDL

Softwares: Microsoft Office, GoogleCloud, AWS, Git, NodeJS, Tableau, PowerBI, MATLAB, LLMs

Libraries: Apache Spark, Pandas, TensorFlow, React, Keras, Matplotlib, Selenium, Spring, Hadoop, SDXL

I also love surfing, philosophy, and tacos!
